Greetings and best wishes for a warm, happy summer.

We have been busy as ever with the Dub All Sense album produced by perch in the Zion Train studio now complete and the Ital Noiz album also being produced by perch in the Zion Train studio nearing completion new projects are afoot.

This last week say the release of 'Dub Revolutionaries – the Very Best Of Zion Train' 2CD on the Nascente label, reviews have been great and it feels really good to have a definitive collection of some of our works from the last 20 years on the market!....

June also saw the release of Volume 9 of the Deep Root Dub conference series on 7 inch vinyl with Abassi welcoming Vibronics back into the collaborative zone AND the Fire In The Hole 10inch release on Universal Egg – these and all available releases are best got here;
